1 Design of a performance technology infrastructure to support the construction of responsive software   ⬛
E. Papaefstathiou
September 2000 **Proceedings of the 2nd international workshop on Software and performance WOSP '00**
Full text available: 🗎 pdf(341.34 KB)   Additional Information: full citation, references, citings, index terms

Keywords: infrastructure, parallel/distributed systems, performance prediction and analysis, responsive software

2 Extending performance approaches to new application domains: An optimization framework for web farm configuration   ⬛
David Bartholomew Stewart, Efstathios Papaefstathiou, Jonathan Hardwick
July 2002 **Proceedings of the 3rd international workshop on Software and performance WOSP '02**
Full text available: 🗎 pdf(220.16 KB)   Additional Information: full citation, abstract, references

A common problem that sales consultants face in the field is the selection of an appropriate hardware and software configuration for web farms. Over-provisioning means that the tender will be expensive while under-provisioning will lead to a configuration that does not meet the customer criteria. Indy is a performance modeling environment which allows developers to create custom modeling applications. We have constructed an Indy-based application for defining web farm workloads and topologies. T ...
